Year-End Checklist: 10 Items to Close 2026 Cleanly

Ten quick checks to finish the year tidy — and walk into tax season ready

1. Sales and expenses fully recorded for the year

2. Bank and credit card accounts reconciled to December

3. Missing receipts and invoices chased down now, not in January

4. Payroll totals checked against remittances, month by month

5. Taxable benefits noted as you go (nothing to reconstruct later)

6. Sales tax reports (GST/HST and QST where they apply) up to date

7. T4 and RL-1 information ready: employee names, addresses and SINs current

8. Asset purchases listed (equipment, vehicle) with their invoices

9. Subscriptions and recurring charges reviewed — cancel what you no longer use

10. One tidy folder, paper or digital, ready for tax season

> **How to use this list:** go item by item with your records folder open. Anything you can't check off is exactly what to fix while the year is still open — each item is much quicker to settle now than to rebuild in January.

General information only — this is not tax advice.
